

scrib ENROLL

K-12 Online Enrollment

Easy, Accessible, Secure

Is it difficult for families in your community to engage in your enrollment process? Are you manually processing application documents, income verification, or payments? Is it difficult to operationalize or update your state or school system requirements each year? Do families need to take time away from work (and perhaps getting paid) to enroll their children into your school system?

With ScribEnroll, school systems can:

Streamline processes

to make it easier for families to engage in the application process and for staff to process application documents and enroll students.

Make programs and applications more accessible

for families through translation to 130+ languages and a mobile-friendly family dashboard that is available 24/7.

Track application status and activity

through the user-facing audit trail, plus the Scribbles Family Dashboard and automated messaging for families. Everyone will have more transparency into the status of an application.

Minimize staff phone calls and follow-ups

through automated messaging to alert families about missing documents and the status of their applications.

Ensure equitable processes

through automation of income verification and other program requirements.

Over 8.7 million student applications have been processed through the Scribbles suite of enrollment solutions.

Ready to get your school system started? Visit www.scribsoft.com to contact us today!

What do ScribEnroll customers have to say?

“Since going with Scribbles our enrollment process has become so much more streamlined. After the initial learning curve, our staff now prefers it to paper. And [the Scribbles] support team is second to none!” - Child Accounting Facilitator/PIMS Administrator, Erie’s Public Schools

“Scribbles saves us loads of paperwork and streamlines the enrollment process from both sides.” - New Hanover County Schools

“The software makes registering a student an easier and quicker process with less mistakes.” - Student Information Manager, Onslow County Schools

“The program is easy to use and makes enrollment so simple. Everything is in the same place.” - Erie’s Public Schools

“Becoming a partner with Scribbles has been the best experience. The team created a program specific for our needs...The program itself has allowed my department to have electronic enrollment and applications. We are then able to send things digitally directly to schools. It also affords us the ability to communicate with families directly through email and phone. Our families have been able to create their dashboard and apply for programs for each of their children - all in the same dashboard - and from the comfort of their home.” - Director of Student Assignment, Gaston County Schools
