

Kodak Alaris Introduces Powerful New Document Scanners for the Desktop

Jan 17, 2023

ROCHESTER, N.Y., 17 January 2023 – Kodak Alaris has enhanced its portfolio of award-winning document scanners with the launch of two powerful, compact models. The **Kodak E1030** and **E1040** provide superior image quality and a simple user interface for fast, reliable information capture.

Backed by industry-leading services and support including a three-year advanced unit replacement warranty, these new desktop scanners are designed to deliver reliable productivity gains and total peace of mind. Perfect Page technology delivers consistent high-quality images that are better than the original. The new Dual Illumination feature eliminates shadows and other artifacts that often occur when scanning damaged originals, further improving image quality and Optical Character Recognition (OCR) accuracy. The E1000 Series also include USB 3.2 connectivity and an 80-page automatic document feeder (ADF).

With their compact size, the **Kodak E1000 Series Scanners** are ideal for desktop use in small to medium-sized businesses, branch offices, reception and admin desks, and enterprises with remote workers. Capable of processing up to 40 pages per minute, the E1000 Scanners can handle a variety of paper sizes and weights, including hard cards. The optional Passport Accessory or integrated A4/Legal Size Flatbed Accessory accommodate document scanning for specialized needs and delicate documents.

The **Kodak E1030** and **E1040** Scanners are easy to set up and use. Office workers can start scanning right out of the box. An intuitive LED control panel makes them easy to integrate into business processes and applications, and Smart Touch technology enables customized scanning workflows with one-touch simplicity.

“In today’s era of hybrid working, digital transformation maturity is more tightly tied to business effectiveness and profitability,” said Joseph Odore, Global Portfolio Marketing Manager at Kodak Alaris. “Successful digital transformation begins with document capture. The new E1000 Series Scanners make it easy for organizations to convert documents into digital information and deliver data to their systems for greater business efficiency and better customer and employee experiences.”
