A Kiosk Book Scanning Solution for Schools & Libraries

The EZ BookScan Center is a walk-up book and document scanning solution designed with education in mind. The EZ BookScan Center is fast, easy to use and eliminates spine shadow and distortions commonly created by copiers and traditional flatbed scanners. The system includes Kiosk-style software for scanning, a large color touch screen monitor and a high performance PC with Windows 7 Professional software at no additional cost.
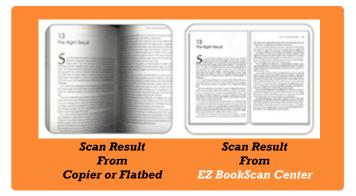

Introducing the EZ BookScan Center

plustek

Trust and Innovation
25 YEARS
Since 1986

Key Features

*   **No book spine shadow**
*   **No page curve distortion**
*   **Scans large 12" x 17" documents in 2.4 seconds**
*   **Optional PS406 duplex color sheet feed scanner**
*   **Vending option available**

Why EZ BookScan Center?

Shadow Elimination Element (SEE) technology

Book spine shadow and distorted text associated with traditional copying is distracting and causes errors when creating PDFs from scanned material. Thanks to this patented technology, book pages lay completely flat on the scanning bed and allow the object to be scanned right up to the spine of the book. The result is clear images with no spine shadow.

Scan Result From Copier or Flatbed   Scan Result From EZ BookScan Center

Easy to Use – No Training Necessary

The EZ BookScan Center is simple to use. The touch screen guides patrons through each step in the scanning process. No training or Teacher/librarians help is needed.

Productivity and Performance

Scan 12"x17" materials at a resolution of 300 DPI color mode in 2.5 sec, minimizing wait time. This allows more patrons to use the system during busy hours.

Quality

Integrated imaging technology specially designed for book and document scanning ensures the EZ BookScan Center will produce high quality images of books, bound materials and documents.

Many Ways to Scan

Multiple Output Options

The EZ BookScan Center features "*Scan to Go*" to make it easy to capture and save book pages and documents. Many different output options are

Scan to Portable USB Drive
Scan to USB allows you to easily scan and save directly to a portable USB drive. This allows patrons to save their scanned items in electronic format and eliminates unnecessary printing.

Scan to Email
Scan to Email is an easy way for patrons to send scanned images as attachments directly to any email address.

Scan to Network Folder
Scan to network folder enables patrons to save scanned images to network attached storage devices and shares. This is a beneficial feature for universities and research libraries.

And more………

The PS406 Automatic Sheet Feed Duplex Color Page Scanner – A smart add-on for the EZ BookScan Center

The PS406 is a 40 page per minute, duplex color document scanner that is not only fast, it's reliable and cost effective. The BookScan Center's Touch Screen and Kiosk software is completely integrated for seamless operation with the system. The result is a total color, digital scanning and printing solution to replace old copier technology.

Specifications
