

PremierOCR

PremierCOMPRESSION

KEY FEATURES

- Up to 140PPM (Simplex);
Up to 280IPM (Duplex)
- Software Includes up to 1.25M
Compressed Images per Month
- Bundle Includes First Year Software
Maintenance
- Intelligent Feed Control
- Stapled Document Detection
- 100,000 Maximum Daily Duty Cycle
- Up to 750 Sheet ADF
- Hardware Image Processing
- USB 3.0
- Color LCD Display
- Intelligent Double Feed Detection

HIGH-SPEED SCANNING MEETS HIGH-VOLUME DOCUMENT COMPRESSION

The KV-S8127-CV and KV-S8147-CV bundles combine Panasonic's newest high-volume production scanners with PremierOCR, a leading document management solution designed to optimize PDF documents. Designed for banks, government, service bureaus and any high volume scanning environment, the KV-S8127-CV and KV-S8147-CV bundles deliver top of the line scanning features with image processing functionality including real-time OCR, advanced compression, PDF/A, Bates-stamping, web-optimization, batch multi-threading and encryption in a single step. With a maximum daily duty cycle of 100,000 scanned pages, these bundles were designed to help increase efficiency by making files smaller, faster, more accessible and easier to process.

The KV-S8127 features high-speed duplex scanning of up to 240 images per minute. The KV-S8147 scans up to 280 images per minute, the top in its class, plus includes features like mechanical deskew and double-feed re-try. Both models support a large capacity of 750 sheets via the built-in ADF*, advanced hardware image processing, and Panasonic's Toughfeed intelligent feed control for scanning a wide range of documents from thin paper to cardboard. The highly durable, long life rollers can scan up to 600,000 documents between replacements.

PREMIEROCR OCR ENGINE

PremierOCR utilizes the latest in image compression technology to convert new and existing documents via Watched Folder or Batch Processing methods to create fully text searchable PDF files. With an OCR engine that is 10% more accurate than competing products and leverages dictionaries for the legal, medical, and financial industries and supports text recognition for 118 languages, PremierOCR reduces the need to spend time manually keying in data.

HIGH-SPEED DUPLEX SCANNING

The KV-S8127 scans at speeds up to 120 ppm/240 ipm and the KV-S8147 scans at speeds up to 140 ppm/280 ipm, placing these machines in the highest speed class for Panasonic's production scanners. With built-in hardware image processing the document scanning speed is the same when scanning at 200 or 300 DPI.

HIGH CAPACITY DOCUMENT FEEDER

The KV-S8100 series boasts a high capacity 750 sheet automatic document feeder. Since a large number of documents can be scanned continuously, the frequency of setup operation can be reduced for higher work efficiency.

FLEXIBLE PAPER TRANSPORT SYSTEM

The KV-S8100 series scanners can easily switch between transport systems via the Paper Exit Direction Selector. The U-turn path is designed for everyday scanning and for thicker or specialty documents, the straight path can be selected.

DURABILITY AND MAINTENANCE

The 600,000 sheet long life feed rollers reduce the frequency of roller replacement allowing for a lower total cost of ownership and reduced maintenance requirements.

PANASONIC TOUGHFEED TECHNOLOGY

The KV-S8100 series includes Panasonic's Toughfeed technology, features include stapled document detection, intelligent feed control for mixed media handling, double feed detection, double feed retry³ and acoustic jam detection. This combination of features ensures your scanned documents are reliably fed while preventing damage to original documents.

¹ The scanning speed differs depending on the host computer, the operating system, the application, the measuring method, the quantity of data in the image, and the paper type. The scanning speed depends on a measuring method of Panasonic.

² The power requirement differs depending on the country/area.

³ Available on KV-S8147 only.
