PSIGEN Document Capture and Imaging Solutions Certified with Epson WorkForce® Scanners

PSIGEN and WorkForce Document Scanners Deliver Increased Efficiency and Flexibility for SMBs and Enterprises

March 31, 2015

LONG BEACH, Calif., March 31, 2015 – Epson America, Inc., a leading provider of digital imaging solutions, today announced several of its business document scanners have been certified for use with PSIGEN Software, a provider of document scanning software and advanced document capture solutions. The combined solution allows SMBs and departmental workgroups to make a seamless transition from paper to digital documents. Epson WorkForce® document scanners deliver fast speeds, high-quality scans and integrate easily into existing infrastructures utilizing PSIGEN's PSI: Capture Enterprise and PSI: Fusion products.

PSIGEN'S document capture solution is designed to meet the needs of small to large organizations in a range of compliance-heavy verticals including healthcare facilities, engineering and construction, government and public sectors, manufacturing, non-profits, legal, accounting, finance, insurance, service bureaus, and education. A need for reliable, high-quality and affordable hardware to work seamlessly with PSIGEN'S software led to the certification of the Epson WorkForce DS-510, WorkForce DS-760, WorkForce DS-860, WorkForce DS-6500, WorkForce DS-7500, WorkForce DS-60000 and WorkForce DS-70000 scanners.

"Our document management products, PSI: Capture Enterprise and PSI: Fusion, help customers succeed because they are engineered to combine automation, efficiency, stability and enterprise-class scalability. They enable easy installation, configuration and meet our customers' need to manage their documents in the most efficient way possible," said Bruce Hensley, CEO, PSIGEN. "Epson is a great partner for our company and provides the best value for our customers because they consistently deliver top-of-the-line scanners with excellent performance, fast speeds, image quality, and reliable paper handling accuracy at an affordable price."

"Epson's partnering with independent software vendors like PSIGEN re-enforces our pledge to provide the best document scanner solutions to our own customers and partners," said Larry Trevarthen, director, Business Imaging, Epson America, Inc. "PSIGEN's advanced and affordable document solutions give businesses of all sizes and in all industries the opportunity to make a smooth transition from paper to digital, making them an ideal match for our wide range of WorkForce business scanner portfolio especially with our Scan-to-Cloud and intuitive one-touch button capabilities available on select models."

The line of WorkForce models offer varied capabilities designed to create excellent document solutions including performance, reliability, fast speeds, image quality and accuracy. The WorkForce DS-760 and DS-860, Epson's fastest professional sheet fed document scanners, are versatile workgroup or departmental solutions designed for a wide range of markets – from healthcare and finance to insurance and legal. Delivering scan speeds up to 65 pages per minute (ppm)2, the DS-760 and DS-860 offer robust duty cycles, scanning up to 4,500 and 6,000 sheets per day, respectively, and can hold up to 80 pages in the built-in Automatic Document Feeder (ADF). The WorkForce DS-510 is a compact scanner with scan-to-cloud capabilities with its intuitive one-touch button, fast scan speeds (up to 26 ppm/52ipm) and the ability to scan to email and PDF.

Large-format scanners including the WorkForce DS-6500, DS-7500, DS-60000 and DS-70000 also offer a robust duty cycle of up to 3,000 to 8,000 sheets per day. Delivering fast scan speeds of up to 70ppm/140ipm (DS-70000),

these higher-speed models can hold up to 100 to 200 pages per day in the ADF. Equipped with flatbeds, the models can scan documents as large as 8.5" x 11.7" to 11.7" x 17" or 8.5" x 40" to 11.7" x 100" via the ADF.

The WorkForce models are equipped with Epson Document Capture Pro, advanced color and image adjustment capabilities, OCR software (DS-510, DS-760 and DS-860), and TWAIN and ISIS drivers for compatibility with third-party programs, such as PSIGEN. The models can scan both sides of one sheet in just one pass for increased efficiency. They also feature ultrasonic double-feed detection technology, which automatically stops the scan job if two pages feed together, enabling users to easily correct mis-feeds without restarting the entire process.

About PSIGEN

PSIGEN Software is the innovative leader in advanced document capture and document imaging solutions. For more than 15 years, PSIGEN has provided software to improve all the processes around the conversion of paper to digital documents. The solutions focus on cost reduction, flexibility, standardization, and improved efficiency. PSIGEN delivers these solutions through a network of resellers and distributors in the US and abroad.
