

## Epson Bolsters Commercial Document Scanner Line with New Epson DS-780N Offering Secure Networking and Built-In Touch-Screen for Ease of Use

*Additional Models Include Epson DS-770 and DS-575W for Increase Business Productivity and Efficiency with Faster Speeds and Flexible Connectivity*

April 18, 2017

**LAS VEGAS (ITEX 2017) – April 18, 2017** – Epson America, Inc., a leading provider of digital imaging solutions, today introduced three new commercial document scanners – the Epson DS-780N, DS-770 and DS-575W for increased office productivity in demanding office environments. The flagship model, the DS-780N offers Epson’s most robust feature set for network security and document management. All models deliver faster speeds†, enhanced connectivity and a robust peak duty cycle<sup>2</sup> for versatile scanning. The DS-780N, DS-770 and DS-575W also come equipped with TWAIN and ISIS® drivers for seamless integration with existing third-party document management software. In addition, these scanners include Epson’s new Three-Year Limited Warranty and Next Business Day Replacement program<sup>3</sup>.

As end users in a wide range of markets – from insurance and legal to healthcare and finance – move to the cloud, it is critical to integrate a secure document management system. The Epson DS-780N provides a new level of network security, including user authentication, which allows control over who can use the scanner. In addition to simply controlling access, the DS-780N can define where documents are stored, encrypted, and named to easily monitor and control the availability of sensitive scanned documents. The DS-780N is also the first Epson document scanner that includes a built-in LCD touch screen panel and the first to have built-in network functions. Businesses can leverage the scanner’s built-in network interface<sup>4</sup> for easy sharing among multiple workstations.

“Our customers count on us to provide the most reliable and impactful document management solutions to meet their needs today and in the future, and having the best hardware partners is critically important,” said Levi Longmore, president, Scanner One. “We’ve always been able to count on Epson to deliver document scanners with the speed, connectivity and features our customers need to increase productivity and efficiency – and with Epson’s new three-year warranty, we know they stand behind their products.”

The Epson DS-780N, DS-770 and DS-575W color document scanners are versatile workgroup sheet-fed scanners, and offer varied feature sets and pricing options:
