

PaperStream Capture Pro: Simple and Powerful Front-End Capture Software

Yokohama, Japan, June 1, 2017 – PFU LIMITED, a subsidiary of Fujitsu Ltd., announced today it will start worldwide sales of its advanced front-end scanning software, PaperStream Capture Pro, which has been on sale in the US since November 2015, with support for 13 different languages.

“PaperStream Capture Pro helps organizations ranging from small and mid-sized businesses (SMBs) to large enterprises reduce costs, minimize resources and increase business efficiency within their document scanning processes”, said Corporate Vice President & President, Document & Imaging Business Group, Yasunori Miyauchi, PFU Limited. “PaperStream Capture Pro allows organizations to quickly translate paper-based data into valuable business information so they can easily manage, search for and leverage business critical content in their Enterprise Content Management (ECM) systems.”

The fi Series image scanners for professional use, the high-quality image processing scanner driver PaperStream IP, and the image capturing software PaperStream Capture / PaperStream Capture Pro enable seamless and streamlined document capturing operations, from pre-scanning operations such as batch creation, to scanning, quality management, indexing, completion of the capture process. By making document capturing more efficient, we help your organization achieve a solid increase in productivity.

Key features:

Scalability to accommodate your organization’s size and easy progress management of your business operations

By selecting the multi-station mode during installation, you can share identical settings with multiple users*1 and de-centralize your operations. Without the need for a server, you can flexibly expand resources to suit your needs and your organization’s structure and size, and efficiently spread the workload of your scanning operations. By using the batch list screen, you can remotely check the progress of your operations and reduce the administrative workload.

PaperStream Capture Pro comes with a perpetual license. This means you do not have to worry about costs that vary depending on page volume or frequency of use. You can freely use PaperStream Capture Pro as much as your organization or operations require.

Easy-to-use UI and functions that support your operation workflow

The UI of PaperStream Capture Pro is simple and easy to use. You can intuitively configure scanning profiles or templates by using a wizard, and start scanning with just one click on an icon. You can visually display files as thumbnails, and automatically detect and mark any errors, multifeed, or blank pages so that you do not overlook them. In addition, you can use Barcode or Zonal OCR to specify document separation methods or meta fields for file naming rules.*2 For document capturing tasks that tend to take time and effort, you can achieve smooth, error-free operation, while being able to improve efficiency.

PaperStream Capture Pro now features improved and expanded capabilities to cooperate with your organization’s back-

end operations after the capturing process. You can integrate PaperStream Capture Pro with remote folders, SharePoint, Box, and other third-party services, or develop your own integration features in order to facilitate the use of scanned images for various operations.

Use the advanced image processing functions of the PaperStream IP dedicated driver

By integrating the dedicated driver for the fi Series image scanners for professional use, PaperStream IP, a variety of functions becomes available. These include After Scan Correction (ASC), a function to realize high quality image correction without the need for rescanning. PaperStream IP's functions remove the need to manage original documents for QC use, and it allows easy output of optimized image data, resulting in less workload for operators. Additionally, you can use the advanced image processing functions of PaperStream IP for imported image files*3 that are generated by devices other than scanners.

From setting to scanning and releasing, PaperStream Capture Pro answers your needs and provides flexible solutions for your business operations. It increases the efficiency of your document capturing process and delivers a seamless, high-quality workflow.

List price and release date

List price and release schedule vary from sales region to sales region.
