Upland Software Ensures the Highest Standards for Reliability and Performance with Certification of Kodak Alaris Scanners

AUSTIN, TX , May 25 2016 - Businesses today are faced with the challenge of optimizing processes, improving productivity, and reducing operational costs, while managing a remote workforce. To meet these demands, Upland Software, Inc. (Nasdaq: UPLD), a leader in cloud-based Enterprise Work Management software, today announced that it will streamline workflow and enable content capture from digital and paper sources through partnership with Kodak Alaris, a global provider of document scanners and capture software solutions.

Upland Software's workflow automation and document management application, FileBound, automates the flow of work, helps businesses manage processes, and reliably connects people and information to decrease costs. FileBound has partnered with Kodak Alaris to ensure customers achieve maximum productivity and versatility. Four Kodak Alaris scanners were tested and validated in Upland's technical lab, including:

•The Kodak i1190 Scanner

•The Kodak i2420, i2620 and i2820 Scanners

The collaborative effort between Upland and Kodak Alaris allows customers and the reseller community to seamlessly and effortlessly turn paper documents into digital files. Those digital files can be used for complex workflows in:

•Enterprise content management

•Accounts payable and receivable automation

•Human resource and healthcare records automation

•Contract process and education workflow automation

•Government document management

Certification of scanners is a critical step in FileBound and Kodak Alaris' ongoing partnership to help customers improve their business efficiencies. "Kodak Alaris' high-quality scanner images and optical character recognition functionality enable our employees to easily route documents to FileBound – where they search, review, and manage all of our critical program documentation with ease," said Jill Schonteich, case management report writer at BI Incorporated, a GEO Group Company.

"Kodak Alaris' heritage and expertise in capturing documents, combined with Upland's powerful automation tools enable our combined customers to capture, process, and manage business information in ways that were never possible before," said Susheel John, Global Category Director, Information Management, Kodak Alaris. "Taking full advantage of our cloud capabilities, users can automate business processes closer to the point of document capture, reducing process time, and improving response to customers. Kodak Alaris is a customer centric, partner focused organization and certification of our products with partners like Upland demonstrates our commitment to help customers reinvent their businesses and accelerate digital transformation."
