

EzeScan to support Kodak Capture Pro Software with advanced integration connectors to eliminate manual processes and increase data accuracy

Clearwater, Florida , January 08 2016 - Outback Imaging USA LLC has reached an agreement with Kodak Alaris to support advanced capture integration connectors for Kodak Capture Pro Software via EzeScan's backend Server Software solution.

EzeScan's current integrations include advanced connection to many leading Document Management Software vendors including HP, Open Text, DocuWare, Xerox, Laserfiche, Sage, Aconex & Xero. The new agreement with Kodak Alaris gives Kodak Capture Pro Software more robust connectivity to these systems.

This EzeScan integration connector is very advanced yet simple to set up, with end users often up and running in a matter of days. Kevin Blackley, EzeScan's International New Business Manager explains, "We see this relationship as a very positive one moving forward. The various integrations will be supported, current and up to date as evidenced by the release this week of the latest Version 10.0 Laserfiche integration at the annual Laserfiche Empower event in Long Beach, California."

"Capture Pro customers now have the ability to collect data off the scanned page and have it directly loaded into their line of business applications like Sage 300, Open Text, Laserfiche, and others using EzeScan Integration connectors. This eliminates manual processes, increases data accuracy, and improves operational performance," said Tom Helmer, ISV Alliance Manager, Kodak Alaris.

"EzeScan has been working with end users globally for many years to get the best out of their desktop scanners," Blackley explains. "Many features for Kodak Alaris scanners are already supported by EzeScan. This extra layer of integration further enhances the ease of use for customers when linking to their document management vendor of choice."

About Outback Imaging USA LLC

Outback Imaging is a research and development company specialising in document capture. EzeScan is Outback Imaging's flagship document capture suite. Our products enable clients to substantially reduce the cost of deploying document processing solutions for unstructured, semi structured and structured (forms based) hardcopy documents, including emails.

About the Information Management Division of Kodak Alaris

Kodak Alaris is a new company driven by the simple belief that "we can always find a better way." Our Information Management division helps organizations capture content from digital and paper sources, extract insights, and deliver the right information to the right place at the right time for better business outcomes. Our portfolio includes award-winning document scanners, a global service and support team, and software and solutions that capture and intelligently manage information. For small offices and large-scale organizations, we provide new ways to automate processes, improve customer interactions and make smarter business decisions.
