

Kodak Alaris Expands Scanner Portfolio Further to Drive Digital Transformation

Oct 10, 2016

Big Data and unstructured information are among the greatest challenges that modern businesses face. The dilemma is that much of the world's data is embedded in countless formats: from email to paper documents, to social media posts, to phone calls, text messages and more.

Today, Kodak Alaris launches a new solution to support business and IT managers in organizations of all sizes, in their quest to master "Data Chaos." It will quickly and affordably digitize paper-based documents to make information easily accessible across an organization and help decision makers and knowledge workers respond faster to customer needs.

The new Kodak i3500 Scanner is the latest addition to the i3000 Scanner family from Kodak Alaris. With speeds up to 110 pages per minute in color, it is ideal for general office settings in a wide range of industries and vertical markets, including government, banking, insurance and healthcare. The included software tools extract critical data from documents and seamlessly feed it into existing business processes and workflows.

The duplex i3500 Scanner has a 300-sheet document feeder, which easily handles anything from business cards to A3 documents with outstanding image quality. Kodak Alaris' Perfect Page technology is integrated, which also includes barcode reading. Ultrasonic multi-feed detection and Intelligent Document Protection (IDP) safeguard fragile documents while they are being scanned by "listening" to the sound of paper going through the transport and stopping at the first indication of document damage, so users can preserve the document and the information it contains.

The scanner features a USB 3.0 compatible interface, and comes with standard drivers and software to integrate with WINDOWS, MAC, and LINUX environments.

Optionally available are flatbeds (A3 and Legal size) to scan pages from magazines and bound documents, as well as an imprinter to mark scanned documents.

The i3500 scanner is now available and comes with a 3 month AUR (advanced unit replacement) warranty. It is available for a list price of \$5,995.

About the Information Management Division of Kodak Alaris

The ever-increasing flood of data, and how we manage it, is one of the greatest opportunities facing businesses and governments in the 21st century. Kodak Alaris works with organizations from small offices to global enterprises, bringing together the best science, technology, services and partner ecosystem so its clients can stay ahead of the curve. From our award-winning range of scanners and software to the best global customer service and support, we're here to help businesses transform data into a powerful competitive advantage.
