Select the smart solution that works best for you

What's the difference between these solutions? Perfect Page was developed by Kodak while **VRS** was developed by Kofax. The results you achieve are similar – beautiful images. Perfect Page allows you to integrate using standard **ISIS, TWAIN, WIA, Mac** and **Linux** drivers, while **Kofax VRS** Professional Software uses its own **VRS** source to create a custom scanning experience.

For most users, the choice between **Kofax VRS** Professional Software and Perfect Page should be determined by your scanning application. For example, some application software requires the **Kofax VRS** interface for connectivity. Kodak offers scanner options to best match your needs either way.

You'll gain quality and advantages either way

- Images that can look better than original documents
- A variety of image-enhancement features enhance accuracy, OCR and downstream process performance
- Easy installation and upgrades

Kodak Asset Management Software and Kofax VRS Elite Software

Along with improving the quality of your images, both Kodak and Kofax have ways to help you manage and maintain your scanners, including features such as software deployment, automatic profiles and central licensing. If you have a **VRS** environment, choose **Kofax VRS** Elite. If you are working within a Perfect Page environment, select **Kodak** Asset Management Software.
