

Compatibility Guide

This guide is intended to provide an overview to a variety of document imaging applications, software toolkits, and hardware products that have been tested to be compatible with the Panasonic family of Production Scanners. You will find a complete listing of all major imaging hardware and software vendors that provide support for Panasonic's line of image scanners through the wide variety of operating environments available today.

The following table provides a quick reference to products and scanners supported by each vendor.

Panasonic Digital Document Company Production Scanner Hardware & Software Compatibility Guide

✓ ISIS certified and/or TWAIN compatible. Evaluation completed by company.

⊘ ISIS certified and/or TWAIN compatible. Configurable solution.

1. Duplex operation not available
2. Duplex and all page (batch) scan not available
3. Via PowerScan and PowerScan StageWorks' Format Bridge
4. Via Cornerstone Input Accel
5. Requires third party capture software
6. In progress - expected within December 2004

ISIS (Image and Scanner Interface Standard) certified drivers for Windows 16-bit and 32-bit TWAIN drivers are bundled with all Panasonic SCSI production scanners.

Because ISIS is a de facto standard and the basis of a proposed industry standard, ISIS users can be confident that the hardware they have purchased will be supported by a variety of applications, and that their imaging applications will support a wide variety of scanners.

Please note that some software vendors may choose not to support all of the features that the scanner supports (i.e. duplex capability, image enhancement). Support of the full range of Panasonic scanners is continuously being updated and compatibility testing may be complete on models not listed.

Every effort has been made to provide factual information in this guide. Panasonic does not take any responsibility for product functionality.
