

## **Ensenta partners with Panini to transform Business Remote Deposit Capture (bRDC) with wireless check scanners for tablets**

Join us at the AFP Annual Conference 2015 to view Tablet bRDC

Ensenta, a leading provider in Mobile Payments, is partnering with Panini to be first-to-market with a wireless tablet based business remote deposit capture (bRDC) solution for multi-check deposits. Panini's innovative wireless scanner technology together with Ensenta's elegantly simple user interface (UI) provides businesses with an efficient hassle free tablet deposit experience.

The Panini ml:Deal wireless duplex check scanner easily integrates with IOS and Android tablets (as well as PCs, POS terminals, and smartphones), regardless of Operating System (OS). This virtually eliminates the headaches and extensive software integration often required to set up a traditional tethered check scanner.

"Panini's ml:Deal is the first and only mobility enabled check scanner," stated Michael Pratt, Chief Executive Officer at Panini. "We are excited to partner with Ensenta and demonstrate the value of the ml:Deal and how it creates an entirely new way for devices to operate in the world of distributed capture."

Tablet bRDC provides a high level of flexibility, usability and portability for small businesses who routinely deposit many checks each day. This unique solution bypasses traditional methods of scanner set up, simply by automatically syncing devices. And, Ensenta's streamlined patent-pending icon driven UI allows users to scan, review and edit multiple item deposits on a single screen. Additional remittance data associated with a payment can be captured leveraging Ensenta's Web Service API.

"Businesses need flexible check payment solutions that fit their unique and dynamic needs," stated Ed Viera, Chief Executive Officer at Ensenta. "With our expanding bRDC solution, business users are supported in-office and out in the field. Our powerful business intelligence coupled with Panini's exceptional hardware is a winning partnership putting the needs of our customers' first."

Ensenta has a true Omni-Channel platform where tablets, smart phones, check scanners and other in-office devices share a universal cloud-based platform. Together with an advanced risk management platform assessing deposits against over 150 risk factors, Ensenta has a configurable, intuitive and highly secure PCI Certified system. Institutions can share common messaging, create user segments and implement common limits and risk policies, and view history across all Ensenta capture channels.

To see the groundbreaking Tablet bRDC in action, join us at AFP 2015 Annual Conference booth #2629.

### **About Ensenta**

Ensenta is an award winning Silicon Valley software developer creating innovative Cloud-based payment technologies for the Financial Services Industry and governmental agencies. Ensenta's products and services are distributed by leading: mobile banking providers; core banking processors; and ATM networks and manufacturers. The company's solutions are used by 725 financial institutions nationwide. Ensenta recently received two XCelent awards for technology and functionality by Celent, a leading financial industry research and consulting firm (Remote Deposit Capture Solutions 2013: ABCD Vendor View).
