

Panini Exhibits at CIAB 2017

Torino, Italy and São Paulo, Brazil (June 1, 2017) – Panini, the global market leader in distributed check capture is participating in CIAB FEBRABAN in São Paulo, Brazil, for the tenth consecutive year. With the 2016 passing of the Brazilian check truncation law it is important for Panini to showcase their RDC portfolio of products at the largest event for the Latin American financial industry.

“As the global leaders in distributed capture, we are committed to the success of this market and have been involved from the beginning in many aspects of Brazil’s check truncation legislation,” says Paula Marques Jaeger, Latin America Account Manager, Panini. “The establishment and growth of important partnerships for Brazil and the rest of Central and South America allows us to continue to support the industry’s transition to check imaging while enhancing our market capabilities and expanding the use of Panini technology within strategic areas such as remote deposit, retail capture, bill payment, and more.”

One such success is Panini’s relationship with Silver Bullet. Panini focused on building a strong partnership with this leading provider of critical tools and services supporting check truncation, to increase their products’ compliance and compatibility for Remote Deposit Capture applications in Latin America. After regulating the use of check imaging for RDC in Brazil, the Panini Vision X scanner was approved by one of the country’s largest banks to digitalize checks from remote, integrating with the support of Silver Bullet’s “Ranger” middleware.

At this event Panini will show its Vision X® range of scanners, including the Vision 1. The Vision 1 is a single feed, high value version of Vision X for highly professional and user-friendly Remote Deposit Capture or low volume Teller Image Capture applications. Also available for demo at the booth will be the Vision neXt™, the ml:Deal™, and the Avantor™ scanner monitoring system. The Vision neXt is Panini’s increasingly successful branch transformation capture platform, delivering robust quality and breakthrough innovations such as its integrated document auto-alignment system, and a 14-line ink jet printer for cut sheet receipts, rich check endorsement, and customer-facing cashier’s check personalization. The Panini ml:Deal is the smart, practical, and secure solution for cost effective and reliable check capture at bank correspondents, capable of interfacing with new or legacy point of sale terminals used by such retailers all over Latin America, maximizing functionality and ROI. The ml:Deal may also be used in RDC, teller, and mobility applications thanks to its API-free, wired or wireless connectivity to a variety of hosts such as PCs, Macs, tablets, and smartphones.

CIAB FEBRABAN 2017 will take place at the Transamerica Convention Center, São Paulo, Brazil, on June 6-8, 2017. Panini is booth number i43.

About Panini

Founded in Turin, Italy, Panini has enabled clients to capitalize on shifts in the global payments processing market for seventy years. Panini has a rich history of technology innovation, leveraging the company’s expertise in research & development. Panini’s market leading solutions are based on state-of-the-art engineering resources and ISO-9001 quality certified production. Panini offers check capture solutions that enable customers to fully realize the advantages and efficiencies available with the digital transformation of the paper check, resulting in the world’s largest deployed base of check capture systems, now approaching one million devices. Panini’s scalable check capture solutions address the complete

range of distributed check processing opportunities including teller capture, back-counter capture, remote deposit capture and remittance processing. The company provides solutions on a global basis, and has direct subsidiary operations in the United States covering North America and in Brazil covering Latin American markets.
