

# Do More Than Process Invoices. Optimize Your Vendor Lifecycle.

“Upland empowered us to unburden our staff regarding those manual time-consuming duties that filled their days. Now, our employees can spend more time on tasks that matter most for the community we serve. After all, we’re here to help people—not to focus on paperwork.”

—Germaine Gross  
VP of Finance & Administrative Services, Volunteers of America Southeast Louisiana

## Unburden Your Staff With a More Strategic Way to Manage Your Vendors

Sure, POs and invoices are a big part of working with vendors—but what if you could take a more holistic view? From selection and onboarding through contracts and payments, Upland can help you automate the entire vendor lifecycle, including our vendor management portal where your vendors can self-service by submitting documentation, invoices, and track payments on their own.

## Selection and Onboarding

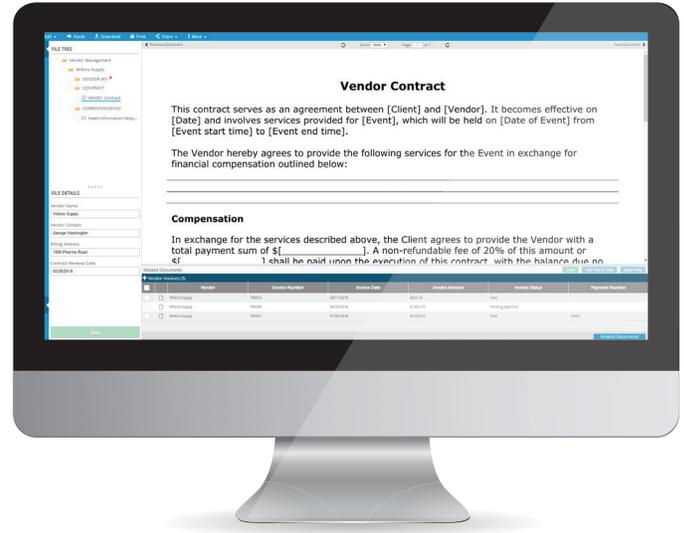

Maximize your efficiency by viewing all of your vendor documents from one place. Quickly toggle through folders, identify missing documents, and compare proposals from different vendors.

## Automate the PO and Payment Process

Streamline your process. Whether a simple invoice, hundreds of line items, or a batch invoice, Upland offers advanced features that allow you to simply scan and go. Workflow immediately begins the approval process based on your criteria, whether by department, location, spend amount, approval limits, or a mix of all variables.

## Vendor Self-Service

Accomplish more with less by eliminating the time your team spends hunting down invoices and responding to vendor queries while empowering your vendors to manage their invoices, check payment status, and escalate concerns with a few clicks. Upland's vendor management portal gives your staff time to do what they do best—manage your company's accounting, not your vendors.
