

Epson Announces WorkForce DS-510 Professional Sheet-Fed Document Scanner

Epson WorkForce DS-510 Brings New Levels of Efficiency and Document Management for Businesses Requiring Robust and Flexible Scanning Solutions

July 30, 2013

LONG BEACH, Calif. – July 30, 2013 – Epson America, a leading provider of exceptional performing business imaging solutions, expands its lineup of professional-grade scanning solutions with the introduction of the WorkForce® DS-510 sheet-fed scanner. This compact scanner offers a range of features to increase efficiency, including scan-to-cloud capabilities¹ with intuitive one-touch button, fast scan speeds and the ability to scan to email and PDF. The WorkForce DS-510 comes with a robust software package including Epson Document Capture Pro, advanced color and image adjustment capabilities, OCR software, and TWAIN and ISIS drivers for ultimate compatibility with third-party programs, providing the image quality and flexibility businesses require to take document management to the next level.

“No matter the industry, businesses are always looking for ways to become more productive and efficient, and Epson is committed to providing its customers with the document imaging solutions needed to keep business moving while producing high quality results,” said Mark Pickard, senior product manager, Document Scanners, Epson America, Inc. “The WorkForce DS-510 builds upon the success of previous models, includes new features based on customers’ requests, and is our most robust and efficient sheetfed scanner yet.”

Flexibility for Increased Productivity

As the landscape of business efficiency continues to evolve and employees are required to utilize remote access to network files, automated workflow and increased access to records management systems is vital to productivity. Epson Document Capture Pro software for Windows PC or Mac® allows users to immediately scan to popular cloud services including Google Docs™, MS SharePoint®, and Evernote®¹ with one touch, and easily access documents from multiple devices or share with others. Document Capture Pro also enables users to efficiently manage and route documents by scanning directly to email, FTP sites or any computer folder.

The WorkForce DS-510 is compatible with most office software programs, and includes TWAIN and ISIS drivers allowing businesses to easily customize scanner applications for increased efficiency and flexibility. Businesses can also leverage networking capabilities using an optional network module¹ (sold separately) to support up to 100 workstations with full scanner functionality.

Compact Yet Built for Power, Efficiency and Quality

The WorkForce DS-510 boasts scan speeds of up to 26 ppm/52ipm² and can scan both sides of one sheet in just one pass, as well as a stack of up to 50 pages with its built-in Automatic Document Feeder (ADF). It is also equipped with ultrasonic double-feed detection technology, which senses if more than a single page has been fed and automatically stops the feeding to avoid missing pages or jamming.

Standing just 6.1” tall, 11.7” wide and 6” deep, the WorkForce DS-510 is compact enough to fit into any office environment, and offers versatile paper handling to meet any business’ needs – from rigid ID cards and stacks of business cards to documents up to 36 inches. It can also scan folded pages without using a carrier sheet – both sides will be scanned, stitched together and saved digitally, for increased ease-of-use.

Delivering high image quality, the WorkForce DS-510 also offers new and innovative advanced color and image adjustment capabilities that are simple to use and offer increased flexibility. When saving in black-and-white, it is often useful to manipulate how the software captures or removes information in color from the original page. Color Enhance captures specific and continuously variable colors from the original document before converting to black-and-white; and Color Dropout removes any color from the scanned image. Users can save up to six different colors to capture or drop for each scan profile, which can be saved for repeat use, ultimately allowing for a wide range of options for simplifying the capture and maintenance of data. The scanner also includes features such as automatic paper size detection, hole-punch removal, automatic de-skewing, and background color removal.

Additional features of the WorkForce DS-510 include:

- **One-Touch Scanning** – Front control panel with up to 30 user-definable scan jobs including scan-to-PDF and scan-to-cloud
- **Robust Duty Cycle** – Up to 3,000 sheets per day
- **Optical Character Recognition (OCR) Software** – Converts scanned documents to editable text
- **Connect to a Computer** – Compatible with Windows® and Mac; hi-speed USB 2.0 connection
- **Eco Features** – Scanner is both RoHS compliant and recyclable

Availability and Support

The Epson WorkForce DS-510 (\$399.99 MSRP) will be available in September through major retailers and distributors. The scanner features a one-year limited warranty, along with optional extended warranties and overnight exchange programs. For more information about Epson scanners visit www.epson.com.
