eFileCabinet Document Management Software Certified with Epson WorkForce® Scanners

eFileCabinet and WorkForce Document Scanners Deliver Increased Efficiency and Document Management for SMBs

LONG BEACH, Calif., Jan. 28, 2015 – Epson America, Inc., a leading provider of digital imaging solutions, today announced several of its business document scanners have been certified for use with [eFileCabinet](#), a leading document management software for small-to-medium sized businesses. The combined solution will allow SMBs to maximize workplace organization and efficiently capture, store, manage, share, and protect valuable data virtually. Epson WorkForce® document scanners deliver fast speeds, high-quality scans and integrate easily into existing infrastructures utilizing eFileCabinet.

eFileCabinet software is designed to meet the needs of SMBs in a range of compliance-heavy verticals including accounting, finance, insurance, HR, small government, medical offices and clinics, non-profits, manufacturing, and transportation. A need for reliable, high-quality and affordable hardware to work seamlessly with eFileCabinet's software led to the certification of the [Epson WorkForce DS-510](#), [WorkForce DS-760](#) and [WorkForce DS-860](#) scanners.

“Our document management solution is particularly successful for small-to-medium sized businesses because it is easy to use, full featured, very secure and value-priced to enable small businesses to succeed,” said Benoy Tamang, vice president, Marketing, eFileCabinet. “We chose to integrate our software with Epson because its WorkForce scanners deliver excellent performance, fast speeds, image quality, reliable paper handling and accuracy at an affordable price, providing the best value for our customers.”

The WorkForce DS-760 and DS-860, Epson's fastest professional sheetfed document scanners¹, are versatile workgroup or departmental solutions designed for a wide range of markets – from healthcare and finance to insurance and legal. Delivering scan speeds up to 65 pages per minute (ppm)², the DS-760 and DS-860 offer robust duty cycles, scanning up to 4,500 and 6,000 sheets per day, respectively, and can hold up to 80 pages in the built-in Automatic Document Feeder (ADF). The WorkForce DS-510 is a compact scanner with scan-to-cloud capabilities with its intuitive one-touch button, fast scan speeds (up to 26 ppm/52ipm) and the ability to scan to email and PDF.

The WorkForce DS-860, DS-760 and DS-510 are equipped with a robust software package including Epson Document Capture Pro, advanced color and image adjustment capabilities, OCR software, and TWAIN and ISIS drivers for ultimate compatibility with third-party programs, such as eFileCabinet. The models can scan both sides of one sheet in just one pass for increased efficiency. They also feature ultrasonic double-feed detection technology, which senses if more than a single page has been fed in to the scanner and automatically stops the scan, enabling users to easily correct mis-feeds without restarting the entire process.

“Epson prides itself on creating document scanning solutions that are fast, as well as provide impressive image quality and versatility, and our certification with eFileCabinet reflects our commitment to enabling businesses to increase efficiency for document management,” said Mark Pickard, senior product manager, Document Scanners, Epson America, Inc. “eFileCabinet is a competitively priced and robust solution ideal for SMBs operating within compliance requirements and an ideal match for our sheetfed scanner portfolio.”

About eFileCabinet, Inc.

eFileCabinet, Inc. offers a suite of document management software and file-sharing products/services to help businesses and organizations work quicker, smarter, and more collaboratively. eFileCabinet provides cutting-edge paperless software products and services that enable companies to capture, store, manage, share, and protect valuable data while helping them meet regulatory compliance requirements from governing bodies such as HIPAA, GLB and SEC/FINRA. eFileCabinet's document management software, file storage, and sharing services can be hosted on a company's local network or as software-as-a-service (SaaS) via the cloud. With more than 12 years in the document management software industry, eFileCabinet is the trusted choice for over 145,000 users worldwide to store, protect, and share their valuable and confidential data.
