Marketing Bulletin 012009-01

Date: January 20, 2009

From: Marketing
Panini North America

To: Panini Sales Channels

Author: Scott Willis
Sr. Product Manager

Product: Vision X

Subject: VX Shipping Contents Update

As implemented and communicated in July, 2008, Panini would like to remind you of two changes to the contents of the shipping boxes that are used to ship the Vision X products.

1. Due to the extended life of the replacement rubber feeder roller and separator roller (300,000 documents each) they are no longer shipped with the Vision X. They may be ordered when needed from Panini North America via the normal consumables order process.
2. In compliance with Panini's ISO 14000 certification and our environmental protection and preservation commitment, the Vision X Operator Manual is now included in CD format within the Vision X shipping box. Paper format is no longer shipped with the Vision X.

For any questions please contact Scott Willis at (303) 452-2586.
