

KOFAX PDF Compression

Kofax PDF Compression reduces the size of your documents by compressing text and graphics resulting in compact, legible PDF documents. With any compression tool, there is a trade-off between quality, speed, and file size. As compression increases, file size decreases and so does the quality of the image. With Kofax PDF Compression, you get a compressed PDF file that delivers the appropriate balance between file size and image quality. Our compression process is extremely quick and provides the smallest file size possible while ensuring legibility of your documents.

Benefits

Readable Images: Files are optimized for clarity ensuring that the content is still readable. The free Adobe Reader is all that is required to view the compressed files.

Fast Throughput: With Kofax PDF Compression, processing speed is not compromised. You get small, compact files with little to no impact on the PDF creation process.

Fast Document Transfers: Smaller files are easier to share and don't overburden your network. You can quickly upload, download, and exchange files as business needs dictate.

Reduced Storage Requirements: Whether you are accessing the files daily or storing them for permanent archival purposes, compressed PDF files require less storage space than uncompressed files.

Out-of-the-Box: Compression settings are configured via the Kofax Capture Administration module providing a single point of deployment.

Technical Details

Compression format:

Binary/Black&White: JBIG2; Color: JPEG

Average Compression results:

Color (200 dpi): 10x smaller; Color (300 dpi): 15x smaller; Binary/Black&White: 2x smaller

Additional processing time required (8.5 x 11 document):

200 dpi: 1 – 1.5 seconds; 300 dpi: 2 – 2.5 seconds

Supported PDF version:

PDF 1.4

Supported PDF formats:

PDF Image Only; PDF Searchable Image Exact

Integration:

Available with Ascent Capture 7.5 SP7 and Kofax Capture 8
